

## Agenda

01	Project	Goal	S

- 02 Overarching Challenges
- 03 Implementation
- 04 Governance
- Data Workflows and Dashboards
- 06 Program Sustainability

## **Overall Project Goals**

- ✓ EQuIS<sup>TM</sup> implementation
- Unify all data in one database
- Provide a single source of truth for many stakeholders
- Improve data analysis tools
- Automate multiple types of reporting
- Increase overall efficiency and quality

### **Initial Challenges**

- Need for universal governance and workflows
- Many stakeholders involved
- No single entity held all the data
- All sites are in active investigation and remediation involving multiple stakeholders and multiple labs
- Entire system needed to be easy enough for almost anyone to use
- Migration must follow the governance

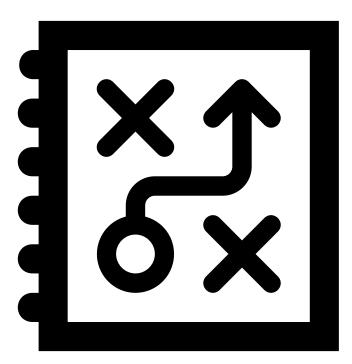

### What's Our Game Plan?

5

- Who are the users?
- Needs assessments
- Regulatory requirements
- What tools and licenses are available?
- Who will run the overall program?
- How to ensure the program is future-proof?

## The Implementation Plan:

- Explore software options
- Build robust data governance into the entire process
- Develop workflows for each data process
- Develop Standard Operating Procedures for all stakeholders
- Migrate the data
- Work towards a balance of internal and external database support
- Prioritize automation
- Dashboards for all users

### **Data Governance**

ERM

- Understand Client's organizational framework
- Define data roles and responsibilities
- Clear content model to support business goals
- Policies and procedures
- Controlled data imports
- Controlled reporting
- Program sustainability

## **Migration**

### **Data Importing Workflows**

### Laboratories

EDDs submitted via email using a custom EDD format and following specific rules

### **Field Data**

EQuIS<sup>TM</sup> Enterprise dashboards with widgets to download EDDs, complete, and upload.

### **Processing**

Custom apps to create EDDs from disparate data sources

### **Project Data**

Stakeholders create EDDs following SOPs and submit to Data Manager for review and loading

### **Data Reporting Workflows**

### **Tabular Reports**

### **Alerts**

### **Data Transfer**

- Automated, formatted Excel tables for regulatory reporting using EQuIS<sup>™</sup> Enterprise and elaborate Excel templates
- Paginated reports from Power BI

Environmental Information Agents send emails when analytical results are higher than expected or exceed permit limits

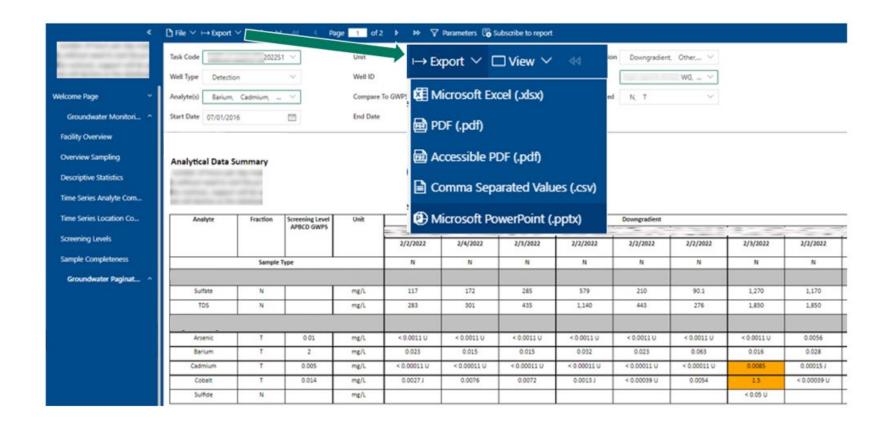

Data exports for third-party use such as QC review, validation, and data analysis are self-serve on Enterprise dashboards

Annual Groundwater Monitoring Event Generic Company Springfield, MA

# Power BI Paginated Reports – Create and Export Formatted Tables

### Data Analysis and Visualization – Power BI

### **Audience**

- Technical and supervisory staff
- Variety of needs and data literacy

### Goals

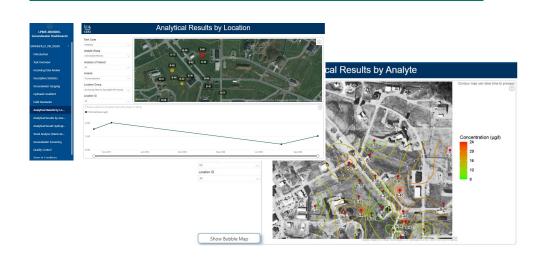

- Provide visualizations to address the most common questions including maps, trends, action level exceedances, statistics, and program progress
- Ensure scalability

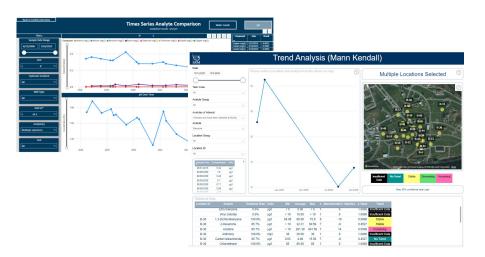

- EQuIS<sup>™</sup> and SPM using the Power BI Connector, the API, and EIAs
- Identify data manager responsible for data source and review

### **Power BI Dashboards**

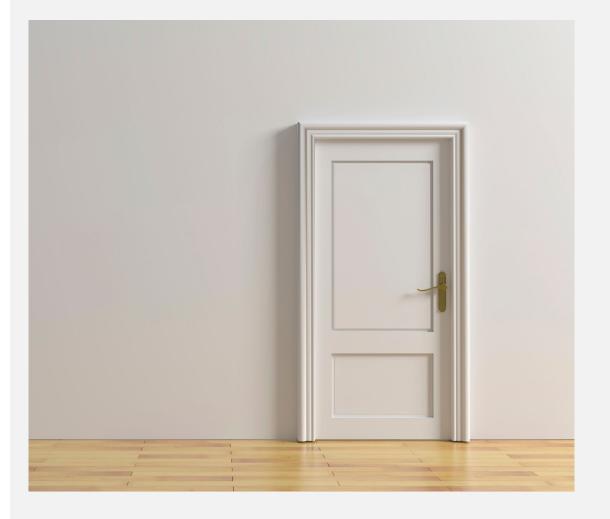

- Automatic refresh from EQuIS<sup>TM</sup>
- All sites use the same dashboards
- Clearly communicate appropriate use and limitations
- Embed clear directions into dashboard
- Provide documentation of data model and functionality

## **Transition Planning**

What comes after implementation? Is our job to eliminate our job?

### **Ongoing Training**

Guidance and support on how to handle any situation that arises for client data managers and stake holders

- Cleaning up data tangles, SPM, updating schemas, rolling back EDDs, laboratory support…etc.
- Providing trainings to all vendors to complete tasks for data transfers

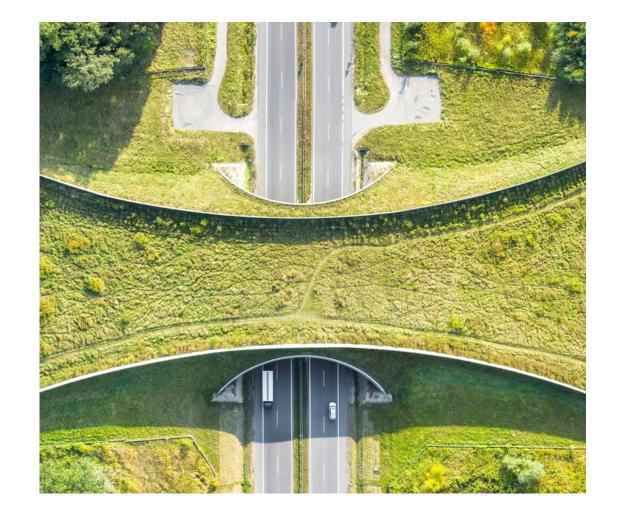

### **Sustained Support**

## Supporting the maintenance of the EQuIS Database

- General support
  - Any tasks that the client data manager needs help with
  - SPM support with updates, changes, and event planning
    - Completeness Checking
  - Importing and monitoring incoming EDDs
  - Identifying and testing new workflows
  - Governance adherence and updates
    - Ensuring SOPs are utilized

### **Continued Client Connection**

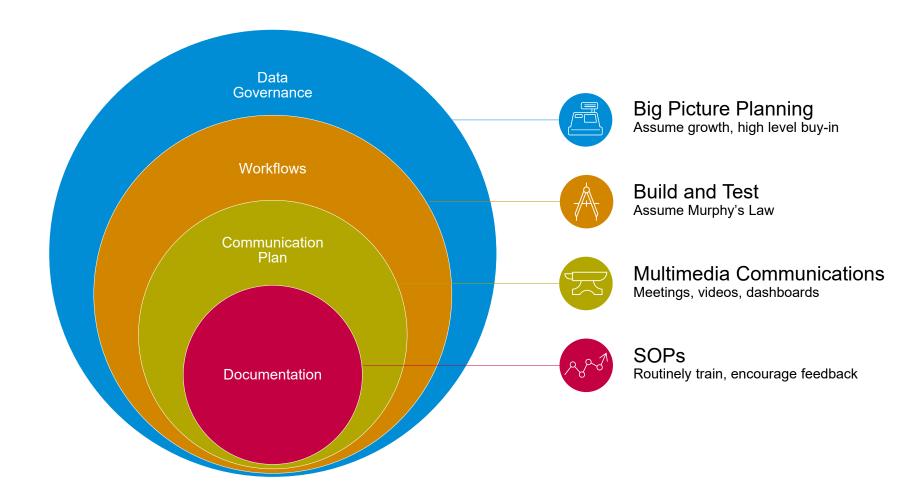

- Weekly check- in calls
- Ensure SOPs are being practiced by all parties
- We can quickly identify any potential need for updates
- Continue to better the processes in place
- Identify future work opportunities

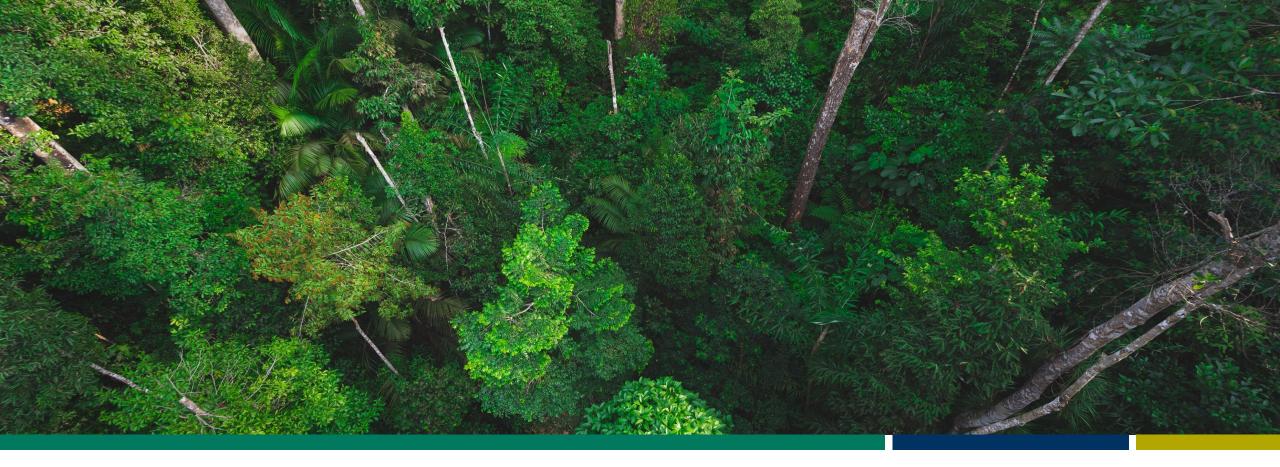

## **Keys to Program Longevity:**

## **Dashboard Testing**

#### A software tester walks into a bar.

Runs into a bar.

Rolls into a bar.

Skips into a bar.

And orders:

a beer.

-1 beer.

Null beer.

99999999 beers.

a bear.

Testing Complete.

A regular customer walks into the bar and asks where the bathroom is.

The bar bursts into flames.
